

PRECISION BARK CONVEYOR

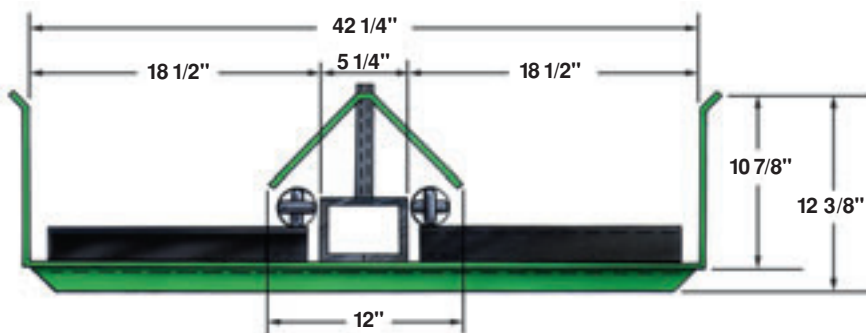

Economical, self-contained unit easily adapted to existing debarking systems, eliminating down time. Used successfully under debarkers, edgers and hogs to remove bark. This bark conveyor is often called a barnsweep.

Standard equipment includes total enclosed, fan cooled motor, (TEFC) with shaft mounted speed reducer. Allows top performance with lower horsepower than those using sprockets.

The rugged heavy-duty chain is hardened alloy for years of trouble-free service.

Please call us, we would like to prove to you that Precision equipment is trouble free for long life and low maintenance.

Quality Driven - Service Oriented
