

PRECISION LIVE DECK

Weighing nearly four tons, the ruggedly-built Precision Live Deck is engineered and built to give years of trouble-free service with minimum maintenance.

- The stop and loader is operated by a 6" bore by 10" stroke air cylinder. Runners are 4" x 10" x 3/8" thick tubing.
- Tail sprockets are adjustable for tightening chain.
- To save wear on chains, welded channel runners have metal wear strips or optional oak liners. Chain returns inside runners.
- 2' Legs are standard, longer legs are options.

Drive shown is worm gear reducer with hydraulic motor. Optional electric motor and worm gear reducer available.

Please call us, we would like to prove to you that Precision equipment is trouble free for long life and low maintenance.

Quality Driven - Service Oriented
